

Earth Housing - Heavy Duty

This Wallis plastic earth housing will withstand loads up to 6,000 Kg and is suitable for most commercial and industrial applications.

The pit is designed, shaped and sized to fit easily into brick paved walk ways. The lip of the pit makes a flush fit with standard sized bricks making the pit blend in with no requirement for a cement surround to the lid.

The lid locks onto the base and can be opened with a standard blade screwdriver. The pit has three slots for earth bars.

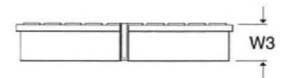

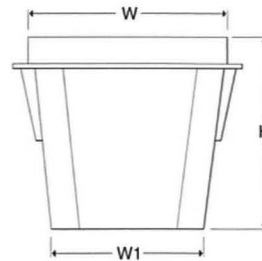

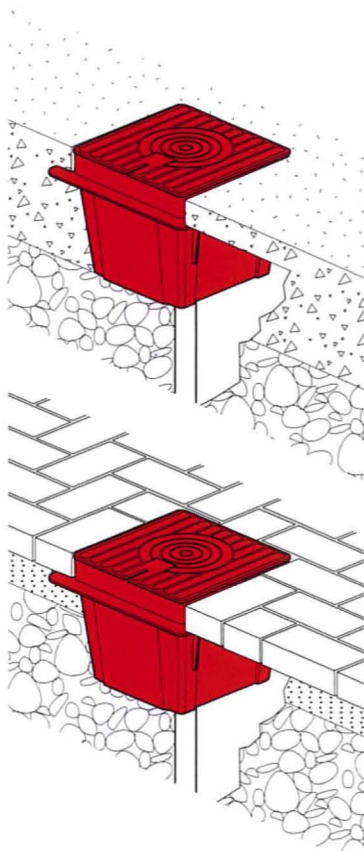

L	H	W	W1	W2	W3	Lid Colour	Weight	Pack Qty	Part Number
309	216	258	208	245	54	Black	3.00	1	EPP 001
309	216	258	208	245	54	Grey	3.00	1	EPP 002

Material:

Base - Polypropylene.

Lid - GRP.

Earth Bars to suit - see page 29.
