

## LIGHTNING PROTECTION

### Plate Type Test Clamp

This Wallis clamp is used to form a disconnecting joint between the down conductor system and the earthing system.

The conductors are secured by four bolts attached to the base, the clamp is also suitable for use in heavy duty applications where the conductors up to 50x6 have to be joined in a crossover or T connection.

Tape Size	Type	D	Weight	Pack Qty	Part Number
25 x 3	Gunmetal	70	0.37	5	JPG 253
25 x 3	Aluminium	70	0.08	5	JPA 253

**Material:**

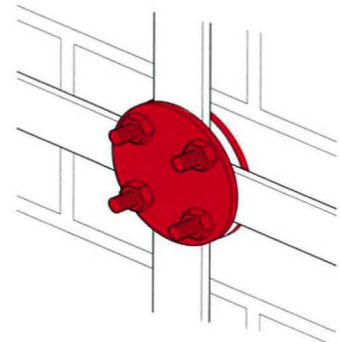

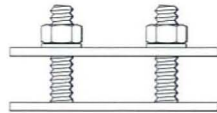

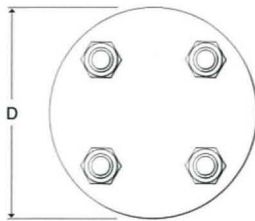

Gunmetal or Aluminium.

### Screw Down Test Clamp

The screwdown test clamp allows easy access to copper conductors where frequent inspection or testing may be necessary, the heavy duty lid simply screws on and off the base, the clamp is manufactured in gunmetal and suitable for copper based conductors only.

Because this Wallis clamp is so simple to unassemble it should not be used at ground level or anywhere within easy reach of the public.
