

**Oxide Inhibiting Compound**

Electrical joint compound, recommended for use on aluminium to aluminium and aluminium to copper connections, on all bare conductors and bus bars. This assures a high conductivity joint by sealing out air and moisture to prevent corrosion and reformation of oxide film.

Size	Container	Pack Qty	Part Number
8 oz	tube	1	IC 08

**Bitumen Felt**

Supplied in rolls or cut to form a felt pad are used on asphalt roofs.

L	W	Weight	Pack Qty	Part Number
